

MiVeda invites you to enjoy the  
following presentation on  
**The Ultimate Choice**

# This presentation...

will outline a small business franchise that will enable you to make an extra income

# That income may be...

**5,000** INR per month

**50,000** INR per month

**1 lac** per month (plus a FREE car)

**5 lacs** per month **or more**

(plus a very expensive FREE car)

# So ultimately...

...the question you need to answer is:

“Are you interested in  
making an **extra income**?”

# We guess that...

The answer is “YES!”

But you probably have a few questions that you want answers to.

So let's have a look at a few issues...

# You probably want to know:

- What is the business?
- How do you make the money?
- What is involved?

# Let us divide...

our presentation into three parts

- Why make a residual, **passive** income?
- What do you have to do to make the money?
- What does it involve?

# We will need a few minutes...

to supply you with the answers.

So before we start you should decide if you want to spend some time evaluating a business franchise that could **change your life**

...both your wealth **and** your health.

# Why make a passive income?

It revolves around three things:

- **Money**
- **Time**
- **Security**

# Money

Would you like to make more money?

Perhaps more money than you currently make in your present job?

In our franchise system you could probably generate more than your current income with about 5-15 hours a week of work.

# Time

Clearly, this increased income would give you more **time** than you have now to spend on doing the things you like

## Think of it...

- more **money**; *and*
- more **time** to enjoy it!

# Security

As well, you can gain short-term and long-term **security**.

So, if you can't go into work because of sickness or an accident **you will still get paid!**

Compare that to your current situation...

# Long-term security

Additionally, you can gain long-term and retirement security.

So you can have more **money** when you **retire**.

This is important because there is no such thing as job security any more.

**Never forget: you could get fired or laid off at any time!**

# Retirement life today...

Even if you retire at 60 or 65...

- You will have less income in retirement than you had when you were working;
- Yet you cannot achieve the life style you want now (**money**, **time** and **security**);
- So it will be a disaster when you have to retire.

# Passive income

It is all about the difference between **active** and **passive** income.

So let's explain that a little bit more...

# A rich dad once said...

Robert Kiyosaki, author of such great books as *Rich Dad, Poor Dad*, *The Cashflow Quadrant* and *Rich Dad's Guide to Investing* explains in these books that all income is earned in four different ways, through four different income 'quadrants' ...

# The four ways of income

These quadrants are:

**E** = Employment

**S** = Self-employment

**B** = Business ownership

**I** = Investing

# Kiyosaki says...

In the **E** and **S** quadrants income is generated by **actively** working for it. If you do not work, you do not get paid.

If you are involved with these quadrants you will make an **active** income.

About 90% of the population earn their money this way.

# The **B** and **I** quadrants...

In contrast, in the **B** and **I** quadrants you earn a **passive** income through the concept of leverage.

Leverage simply means using other people's time or other people's money.

Through leverage you can generate a **passive** income that can continue for your lifetime and beyond.

# Leverage

You can leverage your time through:

- Franchised systems;
- Utilising other people ;  
(employees or other franchisees)
- Investing money.  
(yours or other people's)

# However...

...it's very difficult for the average person to get into the **B** or **I** quadrants.

- It costs lots of money (**capital outlay**);
- You can easily lose your money (**high risk**);
- It requires training and experience (**expertise**);
- It takes up to 80-100 hours a week (**long hours**);
- It may take some time (**years**) to develop a positive cash flow;
- It probably has **high overheads**.

But what if there was a business  
franchise...

...perhaps you could call it

## The Ultimate Choice

...where you could establish your own  
business, but there were **none** of the  
previous requirements?

# You could own and run...

...your own business

- **Part time** (5 to 15 hours per week);
- **From home** (or your office if you wanted);
- With **no risk** and with only **4000 INR** outlay;
- With almost **no overheads**;
- Yet this business could earn you **5000 INR to 5 lacs** (or more) per month;
- And this could be a **passive** income.

# All this is possible

And it comes with a **franchised system** that **teaches and trains** you how to operate the franchise.

In addition, it comes with a **marketing system** that allows you to conduct your business **quickly, cheaply** and **easily**.

# Would you be interested?

Well, there are probably a few more details that you would like to know.

So let's look closer at the franchise...

# The franchise

The business you would become part of is associated with ... MiVeda.

# MiVeda products are unique

MiVeda produces products that are different from others in the marketplace.

They are so good that we estimate about 90% of people who try them will continue to use them on a regular, on-going basis.

**The products work** — so people keep buying them!

# Making money and profit

You can get paid for selling products retail, and there is a substantial retail profit.

However, we rarely suggest selling large amounts of products, for two reasons:

- Many people do not like (or want) to sell;
- Retailing is an **active** income and we want to generate a **passive income**.

# Passive income

So if you want to create a passive income but you don't want to sell anything...

Then we recommend that you establish a **business** using our exclusive marketing tools.

# Your Own Business

This business can generate a substantial income over a period of time if you work it.

The business is a little different because it has multiple levels of income...

Which is why it is called a “multi-level franchise”.

How it works will be explained in a minute, but at this stage you might want to know the business figures.

# In this franchise business...

**MiVeda** pays a **total** of up to **50%** of the wholesale dollar in commissions to its distributors.

This includes the volume that you personally generate from your own promotional efforts.

And also the product flow generated by people who are introduced to the franchise by you and others.

# This means that...

in effect, you are paid **royalties** for training the franchisees who become involved.

We estimate the royalties paid to you will average about 10% of the total volume of products flowing through your business **and** all those of the franchisees involved with you

# So what do you have to do?

Well, to go into the complete details would take longer than we have here.

However, we **can** give you a brief overview.

If you need more information, please ask the person who referred you to this website.

Of course, all of this is **obligation free**.

# Show Me The Money!

This is where you get to review how you can make more money...

- **5,000** INR per month
- **50,000** INR per month
- **1 lac** per month (plus a FREE car)
- **5 lacs** per month **or more**  
(plus a very expensive FREE car)

# How to make 5,000 INR per month

To make **5,000 INR** per month you need to do these three things:

- **Don't change**
- **Tell everyone**
- **Use the products**

Let us look at this in more detail

# 1. Do not change

Just keep on doing what you do normally when you talk to people.

Perhaps similar to you recommending ...

- A movie you liked
- A car you thought was great
- A trip you enjoyed.

Just keep doing what you do now and **do not change.**

## 2. Tell everyone

MiVeda has some exceptional products and we want to tell the world about them.

The reason is because **these products do not have potentially harmful** or carcinogenic **ingredients** in them (like sodium lauryl sulphate, formalin or propylene glycol).

# Why?

You'll find that most **other** products in the market place have these types of ingredients in them and they may be **detrimental** to people who use them.

MiVeda **products are safe for everyone** — including the kids — and they **really work**.

And MiVeda nutritional products can literally be life saving or life changing. No hype, just fact.

# 3. Use the products

You can use all the products, because you will like them and buy them for your family. After all, why wouldn't you when they are so good?

All you have to do then is recommend these products to about 5 to 10 people per month.

They can even be the same people each month if you want (in fact it makes more sense if they are).

You can get about **5,000 INR per month** for doing that.

And that is it!

**What do you think?**

Interested in knowing how to make **50,000 INR** per month? Read on...

# How to make 50,000 INR per month

To make **50,000 INR** per month you need to do these four things:

- **Don't change;**
- **Talk to people;**
- **Tell everyone;**
- **Use the products.**

Let us look at this in more detail...

# 1. Do not change

Just keep on doing what you do normally when you talk to people.

Perhaps similar to you recommending ...

- A music CD you liked;
- A restaurant you thought was great;
- A nice drink you enjoyed.

Just keep doing what you do now and **do not change.**

## 2. Talk to people

We have a part-time business with a company called MiVeda.

We talk to people about it.

It doesn't cost more than a few thousand rupees to set up.

It only takes a few hours per week to operate.

What we do is hand out various marketing and training information to people who are interested in making some extra money from a business of their own.

If they are interested to start, then we help and train them.

# 3. Tell everyone

MiVeda has some exceptional products and we want to tell the world about them.

The reason is because **these products do not have potentially harmful** or carcinogenic **ingredients** in them (like sodium lauryl sulphate, formalin or propylene glycol).

# Why?

You will find that most **other** products in the market place have these types of ingredients in them and they may be **detrimental** to people who use them.

The MiVeda **products are safe for everyone** — including the kids — and they **really work**.

And MiVeda nutritional products can literally be life saving or life changing. No hype, just fact.

## 4. Use the products

You use the products, because you will like them and buy them for your family. After all, why wouldn't you when they are so good?

Over a period of time – months or years, whatever suits you – you need to find 8 to 12 people who are interested in doing the same thing as you.

You certainly don't have to do it right away (although you can if you want).

You can get about **50,000 INR per month** for doing that.

# And that is it!

After that it is up to you.

Interested in knowing how to make **1 lac** per month?

Read on...

# 1 lac per month

To make **1 lac** per month you need to do these five things:

- **Don't change;**
- **Invite people;**
- **Tell everyone;**
- **Use the products;**
- **Establish a business.**

Let us look at this in more detail...

# 1. Do not change

Just keep on doing what you do normally when you talk to people.

Perhaps similar to you recommending ...

- A shampoo you liked
- A holiday location you thought was great
- A TV show you enjoyed

Just keep doing what you do now and **do not change.**

## 2. Invite people

We have a very profitable business model we are involved with.

We invite people to become involved.

It costs a few thousand rupees to set up.

It only takes about 10 hours per week to operate.

We hand out various marketing and training information to people who want help to make some extra money from a business of their own and...

We help them get started.

## 3. Tell everyone

MiVeda has some exceptional products and we want to tell the world about them.

Because they are so good, we estimate 90% of people who try them will want to buy them.

So it is really easy to get people interested.

## 4. Use the products

You use the products, because you like them and buy them for your family. After all, why wouldn't you when they are so good?

You need to **find 5 to 9 people** who are interested in doing the same thing as you.

You certainly don't have to do it right away (although you can if you want).

You can easily do this over the next year or two.

# 5. Establish a business

Between you and the people you talk to and those that they talk to and so on ...

- You will find people who will buy the products and use them regularly
- Over a period of time – you'll find you can end up with about 200 people in your business, even though you might have only personally introduced about 8 people into it
- Then you will get about a **1 lac bonus every month**
- As well, you'll be paid an **extra** bonus (up to 40,000 INR per month) to buy any new car that you want

You do not have to do this overnight, but when you get going, it is really exciting and great fun

# And that is it!

That is as hard as it gets!

**What do you think?**

Interested in knowing how to make **5 lacs** per month? Read on...

# 5 lacs per month *or more*

To make **5 lacs** per month you need to do these five things:

- **Don't change;**
- **Send out information (eg website details);**
- **Use the products;**
- **Find some people;**
- **Establish a Business.**

Let us look at this in more detail...

# 1. Do not change

Just keep talking to people and recommend products you really like.

Just keep doing what you do now and **do not change.**

## 2. Hand out information

MiVeda can be an extremely profitable business. It takes about 10 to 15 hours of work per week.

We invite people to become involved.

We do this by handing out information (eg website details) to people who want help and advice on how to make some extra money.

Then we help them become successful.

# 3. Use the products

MiVeda has some amazing products that we take great pride in. We are introducing them around the world.

They are unique and very effective, so we find that we have a **huge consumption rate**, unlike any other company in our industry.

In fact we estimate that **over 90% of all people** who try our products will **keep on using them**.

That's because **the products work** and they are so good for you. They really can be life changing.

## 4. Find some people

All you need to do is:

### **Find about 10 people:**

- Who want to make 1 lac or more per month
- Who are prepared to work.

The rest is up to you.

# 5. Establish a business

Over a 2 to 5 year period ...

- Between you and the people you talk to and those who they talk to and so on ...
- You'll find that you can end up with about **500 or more people in your business** who will buy the products and use them regularly.
- **Yet you only need to introduce about 10 leaders like yourself.**

# The rewards

At the end of each month, MiVeda can send you **a bonus for over 5 lacs**. They will also ask you to **buy the car of your dreams** and MiVeda can pay for it.

You will be a respected and **recognised business leader**.

You can **travel** around the world each year – tax deductible.

You will be able to **quit your job** – tell the boss he cannot afford you any more.

You will be able to **do whatever you want** everyday, and **take holidays** whenever and wherever you like.

**And that is it!**

**Would that be too hard to take?**

**What do you think?**

# Let us summarise...

This is a **legal** and **ethical** small business concept involved with marketing (not necessarily sales).

It can generate an enormous income for you which can provide:

- More **TIME** than you have now;
- More **MONEY** than you have now;
- More **SECURITY** for you, both now and in the future.

# But...

You have to **want** to change your life from what you have now to what you could have...

You have to be prepared to work **part-time** for **2 to 5 years** to establish your business.

All that is required is to **send out details** to people who are interested.

It is not easy ... but it **sure is not hard.**

In fact it is about as **easy** as it gets in business (and it's a lot easier than a job).

# So, what do you think?

Is it worth giving it a go?

This business works...

...we will provide you with evidence of that

# You might ask...

- **Can I do it?**

Yes you can and we will help you...

- **Will it work for me?**

Yes it can and we will help you...

- **What will my friends think?**

They will probably want some information about it too...

# Change your life

You can change your life with this business.

Do you want to be a victim of your circumstances forever?

Will you volunteer to have a life of constant regret?

**You can do it!**

# One final question...

## What is important for you?

- Extra money
- Better health?
- Helping others?
- Financial freedom?
- Owning your own business?
- More time?
- Financial security?
- Retirement income?

**You  
Choose!**
